

MODEL 24-67 Tone Remote Controller

Available Soon With Updated Circuitry and Capabilities

The Model 24-67 Tone Desktop Remote Controller will soon be available with more standard capabilities than our popular 24-66 Tone Desktop Remote Controller. Option RBC-611 Four Wire, RBC-613 Parallel TX indicator/Notch filter and RBC-622 DTMF Encode will be standard. New capabilities will include Parallel Channel Updates on Tone Control Sequences and External Speaker Jack.

The Model 24-67 Tone Desktop Remote Controller is designed to be used with the Model 20-27 and Model 20-28 Tone Termination Panels. For complete information please refer to the Model 24-67 Tone, Model 24-66 Tone, Model 20-27 Tone and Model 20-28 Tone product specification sheets or contact the IDA sales department. We can be reached at (701)280-1122 or sales@idaco.com.

REMOTES and PANELS for ICOM Radios

IDA Corporation is pleased to announce its newest release of the MODEL 20-28 Tone Remote Termination panel which is compatible with ICOM radios. This serial interface to the ICOM IC-F5061D and IC-F6061D is available in 2 signaling formats: Tone signaling and VOIP signaling.

Also available are interface cables for ICOM non serial controlled radios such as the IC-F9511S and IC-F9521S. These radios are capable of BCD channel change with this cable.

MODEL 21-28 VTP VoIP and Tone Panel

Available Soon With Simultaneous VoIP & Tone Capabilities

IDA Corporation is pleased to announce its new MODEL 21-28 VTP Tone and VoIP Remote Termination panel.

The MODEL 21-28 VTP Tone and VoIP Remote Termination panel is designed for use with the MODEL 24-67 Tone, MODEL 24-66 Tone, and MODEL 24-66 VoIP desktop controller. The MODEL 21-28 VTP interfaces to remotely located base stations or repeaters. Based upon proper control signals received from the desktop controller the MODEL 21-28 VTP directly controls the radio by either binary or serial control.
